| 2 | Open height | 2.1m |
| 3 | Closed height | 0.43m |
| 4 | Canopy size | 3.4m |

Ribs

The contrast of the polished silver mirror trim and the anodised, sand blasted finish of the rib give a unique, high end look.

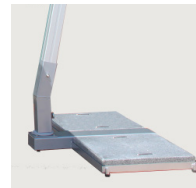

Hub and Runner

Marine grade nylon PA66 ensures a strong, smooth, durable opening mechanism.

Winch system

Manufactured in Italy, the geared winch ensures the canopy is easy to open and close.

Base frame and brackets

All the metal parts are galvanized and then Interpon powder coated. Comes with adjustable feet or optional castor wheels.

Rib ends

We use an eyelet and screw system to fix the cover to the rib end for extra strength and clean lines.

Easy opening

Sprung loaded ribs which stops them from getting stuck inward when closed, making the parasol easy to open.
