

3.0m Square Levante Side Wind

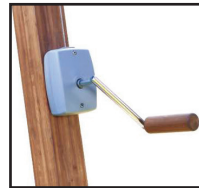

Rib to stay joint
Stainless steel fixing. All parts easily interchangeable.

Rib ends
We use a stainless steel bolt which fixes the canopy to the end of the rib, for extra strength.

Hub and Runner
Using bamboo and stainless steel bracket ensures a strong, elegant centre piece to the canopy frame.

Opening system
Manufactured in Italy, the geared winch ensures the canopy is easy to open and close.

Base frame and brackets
The base weights are made using bamboo box filled with concrete, which sit in a galvanised and then powder coated steel base frame.

Ground bases
We can also supply this parasol with a ground base which is sunk into a concrete.

Post size: 93mm x 93mm

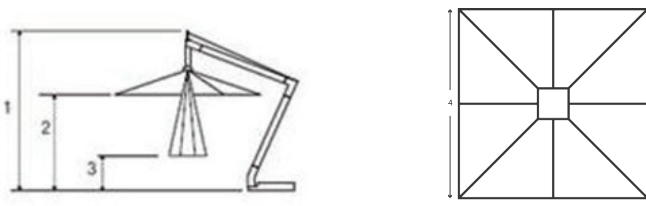

Rib size: 35 x 20mm laminated bamboo makes the ribs exceptionally strong.

Operation: Canopy rotates 360° and upto 45° tilt giving you the choice of angle needed using our rope and cleat system to hold it in place.

Levante Side Wind range: 3 year guarantee for commercial use. 5 year guarantee for domestic use.

The Levante Side Wind range were wind tunnel tested up to 90 kph

1	Total height	2.75m
